

## VIRTUAL TRAINING

Virtual Training can be used as a means to provide high quality and flexible learning experiences to students learning at a distance in conjunction with face-to-face interaction, real-time collaboration and allowing distant learners to access learning experiences. Real-time collaboration, allows a range of uses for teaching purposes. These include:

- Sharing information
- Giving a lecture presentation
- Collaboration in small groups
- Having meetings

A virtual classroom allows trainers and learners to engage in a virtual classroom environment at the same time, wherever they are, as long as they are connected to the Internet. It operates successfully over modem and broadband connections.

### Interactive Training

- Online course catalogues
- Option to charge for training
- Share recorded sessions online
- Configure class size
- Tests and materials (before, during and after)
- Content library (store tests and materials)
- Timer (count down minutes)
- Video two way viewing of session

### Audience Management

- Customisable invitation and registration
- Automated reminder and follow-up emails
- Polls and Surveys
- Attendee "Raise Hands"
- Dashboard to monitor attendee participation
- Detailed reports (pre- and post- session)
- Video two way viewing of session

### Essential Features

- Desktop or Application Sharing
- Instantly changes presenters
- Share keyboard and mouse control
- One-click recording
- Drawing tools
- Includes audio conferencing (via telephone and computer)
